## *Profile*

Driven by my passion for user interfaces, I have worked as a graphic designer, illustrator as well as web designer even before the emergence of web 2.0.

I left France in 2005 to come and settle in Montreal. Having evolved in the web sphere for more than 10 years, my customers benefit from my up-to-date and relevant expertise. This also gave me the opportunity to acquire various web skills which are presently a real strength as I get the capacity to adapt myself to new working environments and teams. Hard-working with a very keen eye for detail, I always provide my clients with the most accurate and creative work and make sure to meet their needs and deadlines.

Always on the look-out for more experiences, I offer my services as a freelance but also as a contractor for large-scale projects.

**Freelance (7vision.com)  
Interface Designer / Web Architect - senior**

2006 - Aujourd'hui

Specialist in web and wireless telephony interfaces. Conception of graphic mock-ups, prototypes, wireframes, navigation maps and front-end development. Not only do I assist the clients in the creative process and development of their project but I also help them revising and improving their previous graphic concepts. Most of my clients are start-ups or web agencies in search of a sharp and creative mind who can look at new ideas with fresh eyes.
